

STEAM is coming to Leopold!

SCIENCE

We are pleased to announce that **Leopold Primary School** will be taking part in a STEAM workshops through [Science Workshop – Primary Workshops \(primaryworkshopsforschools.com\)](http://primaryworkshopsforschools.com).

So, what is STEAM? - STEAM education is an acronym for Science, Technology, Engineering, the Arts, and Math. They are a group of subjects that are all entwined with one another. STEAM gives pupils the tools to employ project-based learning. It encourages students and children to form collaborative methods and understandings of the five fields of knowledge. Using STEAM uses both sides of the brain. Rather than creating a barrier between the two as was done in traditional education, it aims to bring out the artist within the engineer, the mathematician inside the musician, and the scientist within the designer.
